

Asset Assessment

Overview of Assets of Interest

Mehran Nathan Ghamaty and Sun Feb 1

Organized Assets

Facing Tools

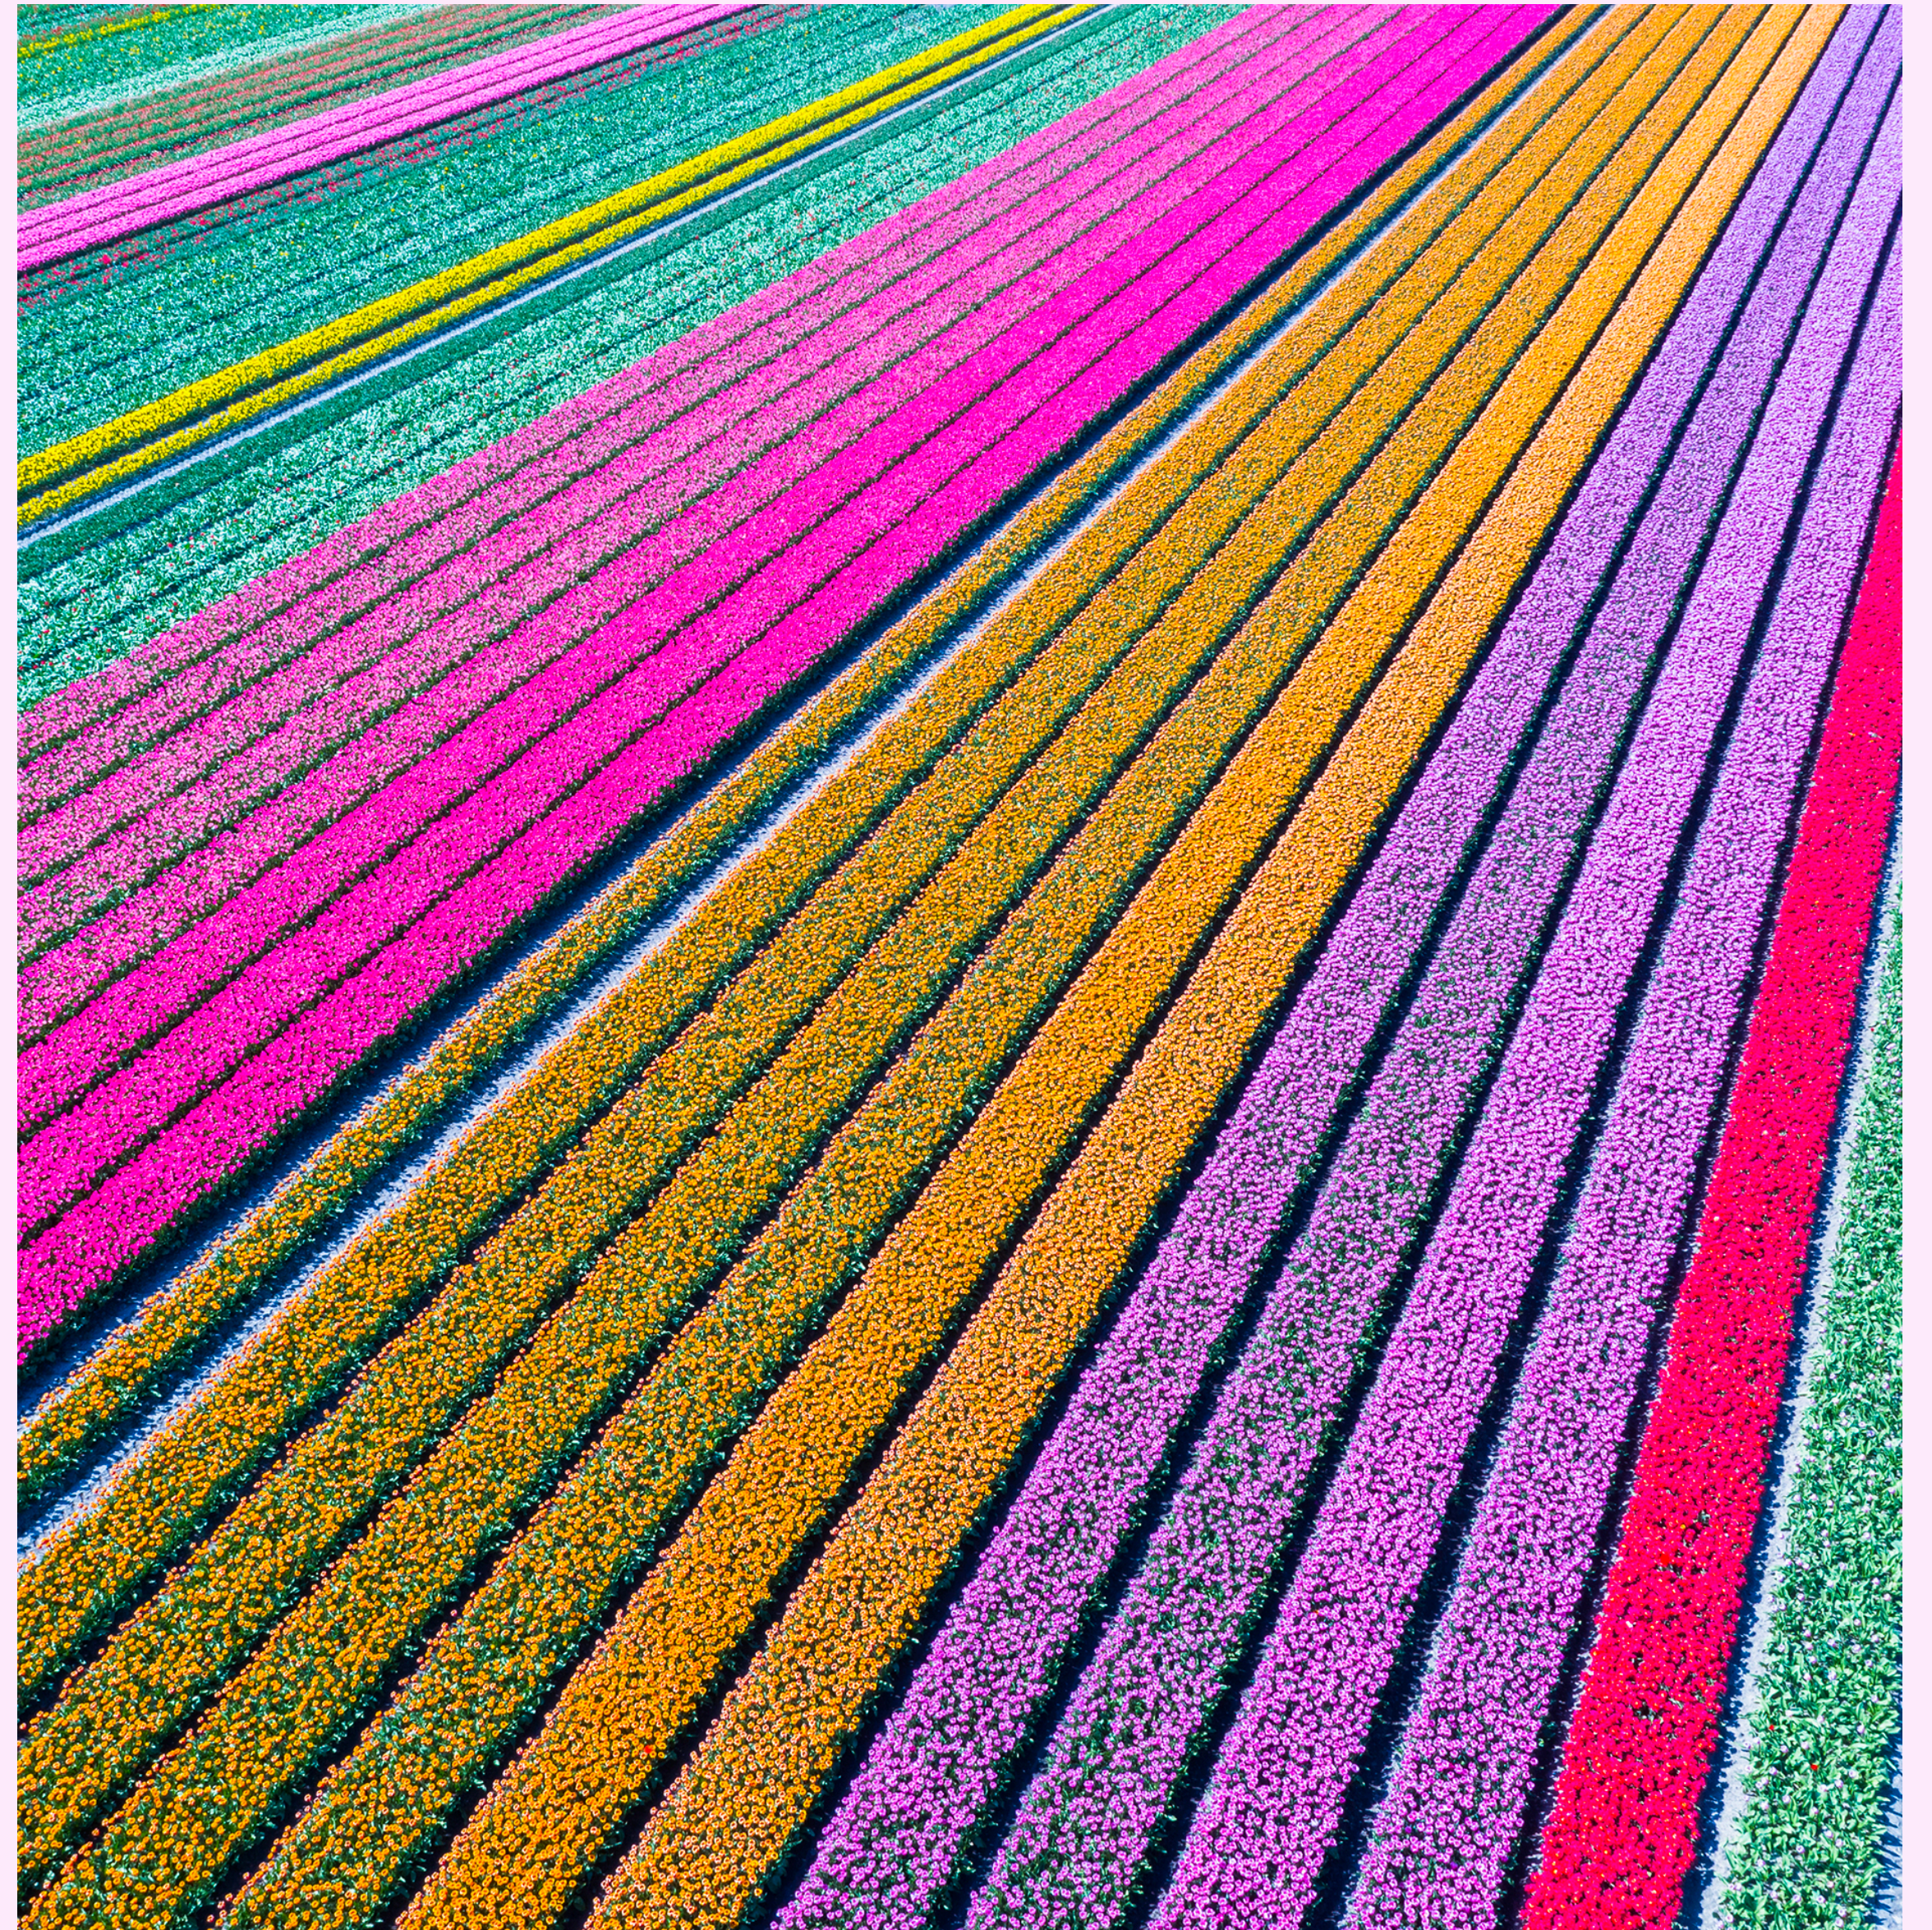

<https://github.com/MeanderingAI/BusinessSite2>

Go Crypto Currency

<https://github.com/MeanderingAI/SyngCoin>

CPP Tool Kit

<https://github.com/MeanderingAI/ToolBox>

Golang Crypto Currency

Features

- TUI + GUI
- Block
- Blockchain
 - MerkleTree Validation
- Transactions

BusinessSite2

Set of Services

- Faced Sites
 - Client-portal
 - Customer-portal
 - Externally facing site to view projects and company information.
 - Admin-portal
 - Internal management with RBACI
- Record Management
 - Central-repo

CPP Toolkit

Organized Assets

- Binaries
- Libraries
- Static Asserts
- Code Tests

Libraries

python_bindings, emscripten_bindings, and Oxygen docs

- IO
 - Libraries associated with enabling the application to communicate with external services.
- Misc
 - Generic tools for interacting operating system assets.
- ML
 - Machine Learning libraries enabling building and training models.
- Security
 - Tools associated with security.

IO — Library

Enabling applications to talk to external services

- `advanced_logging`
- `data_structures`
- `databases`
- `dataformats`
- `distributed`
- `file_system`
- `http_server`
- `servlets`

MISC — library

Providing generic services for applications

- elf_management
- system_stats
- thread_pool
- unix_commands

ML — Libraries

Libraries for learning structures

- bayesian_network
- computer_vision
- decision_tree
- deep_learning
- dimensionality_reduction
- Distribution
- generalized_linear_model
- hidden_markov_model
- latent_sentiment_analysis
- marked_point_process
- multi_arm_bandit
- nlp
- support_vector_machine
- time_series
- tracker

SECURITY — Library

Assets associated with security

- Auth
- Fuzzer
- malware_scanner
- network_scanner

Externally Facing Sites

Network Installation

Addresses

Intended Software
